Abstract v

Acknowledgements vii

1 Introduction 1

1.1 The Pattern Problem 4

1.2 Thesis Overview 6

2 Background 9

2.1 The 1D Shape Pattern Problem 9

2.2 Focused Color Searching 12

2.3 From Histogram Intersection to the Earth Mover's Distance 16

2.4 The Earth Mover's Distance 18

2.5 Matching under Transformation Groups 22

2.5.1 The Hausdorff Distance 22

2.5.2 The ICP Iteration 26

2.6 The FOCUS Image Retrieval System 29

3 The Polyline Shape Search Problem 33

3.1 Problem Setup 35

3.2 The Best Rotation 38

3.3 The 2D Search Problem 39

3.3.1 Faces 43

3.3.2 Edges and Vertices 46

3.4 The Algorithm 47

3.5 Results 50

3.6 Summary and Suggestions for Future Work 53

4 The Earth Mover's Distance (EMD) 59
4.1 Basic Definitions and Notation . . . 62
4.2 Connection to the Transportation Problem . . . 67
4.3 Special Cases . . . 69
4.3.1 Point Set Matching using the EMD . . . 69
4.3.2 The EMD in One Dimension . . . 71
4.4 Modifications . . . 80
4.4.1 The Partial Earth Mover's Distance . . . 80
4.4.2 The Restricted Earth Mover's Distance . . . 83
4.5 Use in Scale Estimation . . . 85
4.5.1 Experiments with the Color Pattern Problem . . . 91

5 Lower Bounds on the EMD 97
5.1 Centroid-based Lower Bounds . . . 98
5.1.1 Equal-Weight Distributions . . . 98
5.1.2 Unequal-Weight Distributions . . . 100
5.1.2.1 The Centroid Lower Bound . . . 101
5.1.2.2 The Centroid Bounding Box Lower Bound . . . 103
5.2 Projection-based Lower Bounds . . . 104
5.3 Experiments in Color-based Retrieval . . . 110

6 The EMD under Transformation Sets 123
6.1 Definitions and Notation . . . 125
6.2 A Direct Algorithm . . . 128
6.3 The FT Iteration . . . 128
6.3.1 Similar Work . . . 131
6.3.2 Convergence Properties . . . 133
6.4 The Optimal Transformation Problem . . . 135
6.4.1 Translation . . . 135
6.4.1.1 Minimizing a Weighted Sum of Squared L_2 Distances . . . 137
6.4.1.2 Minimizing a Weighted Sum of L_1 Distances . . . 137
6.4.1.3 Minimizing a Weighted Sum of L_2 Distances . . . 141
6.4.1.4 Minimizing a Weighted Sum of Cyclic L_1 Distances . . . 142
6.4.2 Euclidean and Similarity Transformations . . . 147
6.4.3 Linear and Affine Transformations . . . 147
6.5 Allowing Weight-Altering Transformations . . . 148

6.6 Some Specific Cases . . . 151
6.6.1 The Equal-Weight EMD under Translation with $d = L_2^2$ . . . 152
6.6.2 The Equal-Weight EMD under Translation on the Real Line . . . 152
6.6.3 The Equal-Weight EMD under $\mathcal{G}$ with $m = n = 2$ . . . 154
6.7 Global Convergence in $\mathcal{F} \times \mathcal{G}$? . . . 156
6.7.1 Partial Matching . . . 157
6.7.2 One Optimal Flow or Transformation . . . 160
6.7.3 A Perfect Match under Translation . . . 161
6.7.4 Equal-Weight Comparisons with Local Minima . . . 163
6.8 Odds and Ends . . . 169
6.8.1 L_2^2 versus L_2 . . . 171
6.8.2 Sensitivity and Growth Rate . . . 172
6.9 Some Applications . . . 175
6.9.1 Lighting-Invariant Object Recognition . . . 175
6.9.2 Feature Matching in Stereo Images . . . 177

7 The SEDL Image Retrieval System 181
7.1 SEDL's Image Signatures and Distance Function . . . 185
7.2 The Scale Estimation Phase . . . 188
7.3 The Initial Placement Phase . . . 189
7.3.1 Experiments with the Color Pattern Problem . . . 194
7.4 The Verification and Refinement Phase . . . 195
7.5 Results . . . 205
7.5.1 The Product Advertisement Color Database . . . 205
7.5.1.1 Creating Signatures . . . 205
7.5.1.2 Query Results . . . 212
7.5.1.3 SEDL versus FOCUS . . . 217
7.5.2 The Chinese Character Shape Database . . . 217
7.5.2.1 Creating Signatures . . . 230
7.5.2.2 Query Results . . . 230
7.5.2.3 Possible Modifications . . . 231

8 Conclusion 241
8.1 Thesis Summary and Discussion . . . 241
8.2 Future Work . . . 244
8.3 Final Thoughts . . . 247
