Abstract **v**

Acknowledgements **vii**

1 Introduction **1**

1.1 The Pattern Problem 4

1.2 Thesis Overview 6

2 Background **9**

2.1 The 1D Shape Pattern Problem 9

2.2 Focused Color Searching 12

2.3 From Histogram Intersection to the Earth Mover's Distance 16

2.4 The Earth Mover's Distance 18

2.5 Matching under Transformation Groups 22

2.5.1 The Hausdorff Distance 22

2.5.2 The ICP Iteration 26

2.6 The FOCUS Image Retrieval System 29

3 The Polyline Shape Search Problem **33**

3.1 Problem Setup 35

3.2 The Best Rotation 38

3.3 The 2D Search Problem 39

3.3.1 Faces 43

3.3.2 Edges and Vertices 46

3.4 The Algorithm 47

3.5 Results 50

3.6 Summary and Suggestions for Future Work 53

4 The Earth Mover's Distance (EMD) 59
4.1 Basic Definitions and Notation . . . 62
4.2 Connection to the Transportation Problem . . . 67
4.3 Special Cases . . . 69
4.3.1 Point Set Matching using the EMD . . . 69
4.3.2 The EMD in One Dimension . . . 71
4.4 Modifications . . . 80
4.4.1 The Partial Earth Mover's Distance . . . 80
4.4.2 The Restricted Earth Mover's Distance . . . 83
4.5 Use in Scale Estimation . . . 85
4.5.1 Experiments with the Color Pattern Problem . . . 91

5 Lower Bounds on the EMD 97
5.1 Centroid-based Lower Bounds . . . 98
5.1.1 Equal-Weight Distributions . . . 98
5.1.2 Unequal-Weight Distributions . . . 100
5.1.2.1 The Centroid Lower Bound . . . 101
5.1.2.2 The Centroid Bounding Box Lower Bound . . . 103
5.2 Projection-based Lower Bounds . . . 104
5.3 Experiments in Color-based Retrieval . . . 110

6 The EMD under Transformation Sets 123
6.1 Definitions and Notation . . . 125
6.2 A Direct Algorithm . . . 128
6.3 The FT Iteration . . . 128
6.3.1 Similar Work . . . 131
6.3.2 Convergence Properties . . . 133
6.4 The Optimal Transformation Problem . . . 135
6.4.1 Translation . . . 135
6.4.1.1 Minimizing a Weighted Sum of Squared L_2 Distances . . . 137
6.4.1.2 Minimizing a Weighted Sum of L_1 Distances . . . 137
6.4.1.3 Minimizing a Weighted Sum of L_2 Distances . . . 141
6.4.1.4 Minimizing a Weighted Sum of Cyclic L_1 Distances . . . 142
6.4.2 Euclidean and Similarity Transformations . . . 147
6.4.3 Linear and Affine Transformations . . . 147
6.5 Allowing Weight-Altering Transformations . . . 148

6.6 Some Specific Cases 151
6.6.1 The Equal-Weight EMD under Translation with $d = L_2^2$ 152
6.6.2 The Equal-Weight EMD under Translation on the Real Line 152
6.6.3 The Equal-Weight EMD under $\mathcal{G}$ with $m = n = 2$ 154
6.7 Global Convergence in $\mathcal{F} \times \mathcal{G}$? 156
6.7.1 Partial Matching 157
6.7.2 One Optimal Flow or Transformation 160
6.7.3 A Perfect Match under Translation 161
6.7.4 Equal-Weight Comparisons with Local Minima 163
6.8 Odds and Ends 169
6.8.1 L_2^2 versus L_2 171
6.8.2 Sensitivity and Growth Rate 172
6.9 Some Applications 175
6.9.1 Lighting-Invariant Object Recognition 175
6.9.2 Feature Matching in Stereo Images 177

7 The SEDL Image Retrieval System 181
7.1 SEDL's Image Signatures and Distance Function 185
7.2 The Scale Estimation Phase 188
7.3 The Initial Placement Phase 189
7.3.1 Experiments with the Color Pattern Problem 194
7.4 The Verification and Refinement Phase 195
7.5 Results 205
7.5.1 The Product Advertisement Color Database 205
7.5.1.1 Creating Signatures 205
7.5.1.2 Query Results 212
7.5.1.3 SEDL versus FOCUS 217
7.5.2 The Chinese Character Shape Database 217
7.5.2.1 Creating Signatures 230
7.5.2.2 Query Results 230
7.5.2.3 Possible Modifications 231

8 Conclusion 241
8.1 Thesis Summary and Discussion 241
8.2 Future Work 244
8.3 Final Thoughts 247
